

Paul Ruiz is Director of Energy and Environmental Affairs at the American Trucking Associations (ATA) in Washington, D.C. He supports the trucking industry with energy and environmental policy research, analysis, and coalition-building. This year, he led the trucking industry's comments on the EPA's Greenhouse Gas Phase 3 rule. He also directs ATA initiatives, including its Energy and Environmental Policy Committee, Climate and Clean Energy Advisory Committee, and the Clean Freight Coalition. Before joining ATA, Paul was Senior Policy Analyst at Securing America's Future Energy (SAFE) in Washington, DC. At SAFE and the EC, Paul led projects related to global oil markets and light- and heavy-duty vehicle electrification. He is a Clean Energy Leadership Fellow, a member of the National Association for Energy Economics, and he holds a graduate degree in public policy from the Biden School at the University of Delaware.
