

Lindene E. Patton is a partner at **Earth and Water Law, L.L.C.** and a licensed real estate agent in Virginia and Maryland. She is a transactional attorney with extensive experience in the business of insurance, InsurTech, environment and data technology, including IP, privacy and related compliance matters. She is a globally recognized expert in risk management, data, resilience and related risk management solutions, insurance policy and other financial services product development.

Before joining E&W Law, LLC she served as Global Head of Hazard Products for Corelogic; Chief Climate Product Officer for Zurich Insurance Group, and division general counsel for a large global insurer, as well as engineering and land fill design companies.

Practice Area: Today, Lindene supports InsurTech start-ups, for admitted and surplus lines, providing property, casualty and specialty lines coverages, from inception to launch and for ongoing operations. She advises a variety of entities on insurance strategy and large loss claims. She revises policy forms in response to emerging risk and more. She has had appointments to the World Economic Forum, the International Energy Agency, the US Department of Commerce, the National Academy of Sciences and the Geneva Association. She has testified in the U.S. Senate and the U.S. House of Representatives on matters related to risk management, resilience, climate change and CCS.

Lindene serves clients where the science meets the law, with practical legal advice that supports operational excellence and transformation.
